-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 2627

In response to applicant's amendment dated September 26, 2006. The following action is taken:

The claims are rejected for the same reasons set forth in the previous office action repeated herein.

Applicant's representative is respectfully asked to setup a telephonic interview with the examiner of record to discuss the outstanding office action.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka et al (4389681).

The claims are merely drawn to a data bit "control bit" specifying an action in a data medium. The claims read on a header data having address bits specifying a servo action. The claim also read on a sync data having sync bits specifying a synchronization signal. Basically the claims read on an inherent feature of an optical disk having generic control bits for an action needed during the disk operation. The reference shows a medium having data blocks divided into sectors having ECC blocks, each of the data sectors having control bits C having a specific sampling rate "action" during the reading of data meeting the broad interpretation of the claimed invention as cited in column 9 line 35 to column 10 line 55.

With respect to the limitations of claims 2, 4 and 6. The claim is drawn to a medium having sectors within a track having ECC as shown in fig 2B.

Applicant's arguments filed September 26, 2006 have been fully considered but they are not persuasive. Applicant's arguments drawn to the prior art not showing the limitation, bits within the control field and control block. It is the inherent feature of every optical disk to have a control block (TOC) HAVING THE ADDRESS, TIME, TITLE...etc information of every data field on the disk. The optical disk further having control filed with bits (address) of each of the information piece on the disk. These address bits specifying a start and end address data (action) by the TOC (control block) of every information piece on the disk meeting the claimed invention.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
